

"SMART" Dust Guard for 125mm angle grinders !

Dust generated on the construction site is becoming a more serious problem because of its harmfulness to our health and the environment.

CYCLONE is the Dust Guard for 125mm Angle Grinder of almost all brands, meeting the latest EN-standards.

Not only the high performance of dust collection, but also the SMART functions securely support your work.

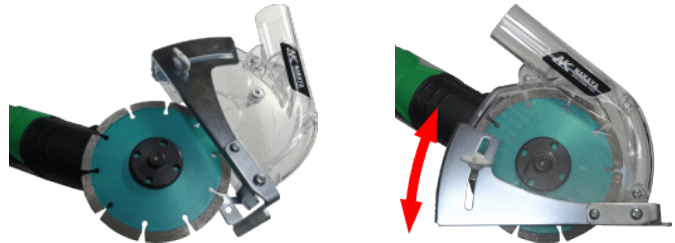

■Over 97% Dust Collection & Stable Front Guide

The specially designed dust flow inside of the shroud enables CYCLONE to collect more than 97% of the dust during the work* Yet the new designed Front Guide always keeps CYCLONE stable in any situation. Not only in normal cutting but also grooving, and tuck-pointing.

- *When using vacuum systems over 1000W, with the maximum cutting depth.

■Easy Blade Change (EBC) System

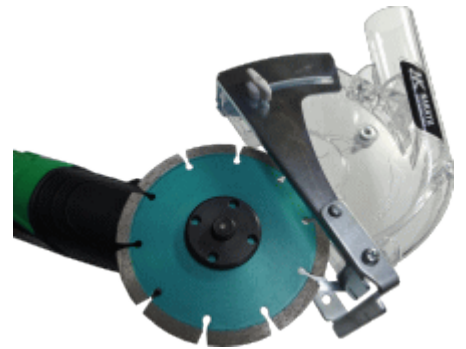

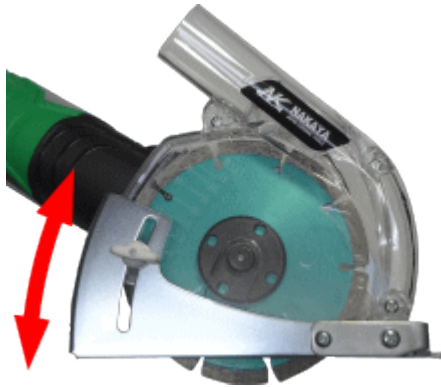

With our patented EBC system, the blade can be changed with just one operation, no need to detach the Angle Grinder from CYCLONE anytime.

■Cutting depth adjustment

Just by operating the Knob screw on the front, cutting depth can be set in any length from 5mm up to 33mm. *when using 125mm blade.
